

# 7

## Steps for Cannabis Certification

Certification for cannabis and hemp producers to help maintain Good Manufacturing Practices (GMP) and demonstrate safe handling of cannabis products.

01

Submit application for consideration and complete participation agreement.

07

Adhere to annual maintenance process, including annual quality audits.

02

Complete optional pre-audit of your facility to determine where gaps exist and improvements can be made to your Quality Management System.

06

Apply ASTM certification mark to your website, emails and other marketing materials.

03

Remit payment for participation and all audits.

05

If approved, SEI will send certification notice that your facility meets all specifications.

04

Conduct full facility audit, including Quality Management Systems and Good Manufacturing Practices (GMP) of products and processes.
